About EuroCert:

EuroCert Auditing & Certification Services Co. Ltd. was founded in response to the growing global awareness and appreciation by leaders of business and indeed communities of the need to act in a truly sustainable manner particularly in terms of improvement of management systems, auditing & certifying services.

Scalable sustainable development can occur when corporations, governments and individuals work towards a common vision. To achieve this vision we must commit to the principles and terms of social responsibilities in each of every aspect of our missions. We take a broad view of corporate responsibility and embrace a range of activities from small, one-off events inspired by individual employees to large, sustained activities.

In EuroCert we believe our commitment to sustainability – in its projects, support for communities and as a successful and progressive company – is a direct reflection and expression of our corporate purpose, values and conduct. So, we are now finding that we are winning work because clients see that we are embedding the principles of sustainability in our business.
